## EV (ELECTRO-VOICE®) REINTRODUCES N/D367s VOCAL MICROPHONE AT INFOCOMM

EV N/D367s Wired Microphone Features Smooth, Controlled Frequency Response

**ORLANDO, FLORIDA (June 3, 2003):** EV (Electro-Voice®) is proud to announce the reintroduction of the N/D367s vocal microphone at INFOCOMM, Booth #534, 635. Due to continued interest and demand from dealers and customers, the N/D367s is being reintroduced at INFOCOMM. Unique to the marketplace as a microphone that performs like no other with the female voice, the N/D367s is once again available.

When exceptional performance is a must in demanding situations, the N/D367s is the mic of choice. A tight cardioid pick-up pattern, specially tailored frequency response, and unrivaled low handling noise put the nuances of any voice in front of the mix. With added sensitivity in the 1-2 kHz region and a smooth, controlled response above 2 kHz, the N/D367s responds to vocal harmonics with a full and balanced feel. The N/D367s features an on/off switch, durable, rugged construction and a superior multistage shock mount, making it ideal for use in both concert vocal as well as podium or conference table applications.

For more information, call 1-800-392-3497, or visit www.electrovoice.com.
