# FULL LINE OF ELECTRO-VOICE® PRODUCTS NOW FEATURED IN STARDRAW SOFTWARE

Sound Contractor/Systems Integrator Software Program Stardraw Database Updated with Electro-Voice® Product; Process Streamlined to Update Stardraw with New Product Files

**BURNSVILLE, MN (October 9, 2002):** Driven by customer and Electro-Voice user demand, Electro-Voice has converted all of their product CAD files to a format for audio/AV/radio/video software company Stardraw. As a result, Electro-Voice is proud to announce that Stardraw now features all product files necessary to complete the program's symbols archives. From Vari-Intense and FRi+ loudspeakers to the X-Line and beyond, sound contractors can now find all of the files necessary to complete their designs.

With our customers and colleagues in mind, we look forward to a continued relationship with Stardraw. Electro-Voice engineering has now streamlined a process by which Stardraw is automatically sent Stardraw-format CAD files whenever a new Electro-Voice product is introduced. We hope that these improvements enable sound contractors, systems integrators, and audio professionals around the world to more frequently and efficiently include Electro-Voice products in their bids and designs.

Electro-Voice® is a professional audio brand of Telex Communications, Inc., a leader in the design, manufacture and marketing of sophisticated audio, wireless, multimedia, broadcast and communications equipment for commercial, professional and industrial customers. Telex Communications markets its products in more than 80 countries under the brands EV®, Telex®, RTS™, AudioCom™, RadioCom™, Dynacord®, Midas®, Klark Teknik®, University Sound® and others.
