## *The New Word in Wireless*

*Say goodbye to drop-outs and annoying interference with EV's N/DYM®*

*Series UHF Wireless.*

*Tired of replacing cables? Bothered by the mess of cords on stage? Curious about wireless technology but worried about the quality of your vocal or instrument signal? Want the freedom to play, sing, and perform from anywhere on stage? With EV's N/DYM Series UHF Wireless the world is your stage whether you're rocking in the rafters, rhymin' and scratchin', or leading a lecture. Expect zero compromise with EV's N/DYM Series UHF Wireless.*

*The N/DYM® Series UHF Wireless is a 10-channel frequency-agile system that provides professional quality performance at a price working musicians can afford! N/DYM wireless also features the latest in wireless technical innovations – ClearScan™ auto channel select. ClearScan™ greatly simplifies system set-up by automatically scanning and selecting a clear channel for trouble-free operation. The handheld systems feature EV's famous N/DYM elements for great sound and performance. The N/DYM Series UHF Wireless from EV sets the new standard for wireless system and value.*

## *Features*

- **ClearScan™ Technology**
- **10-channel UHF Frequency Agility**
- **N/DYM elements**
- **Metal receiver housing**
- **8-10 performance hours of battery life**
- **Secure-Phase™ diversity for clear, drop-out-free audio**
- **Fixed, front-mount antennas for quick system setup**
- **Balanced, mic-level XLR output**
- **Level adjustable, unbalanced 1/4" output**
- **Adjustable squelch control**
- **Transmit and Diversity LED indicators**
- **Channel-change lockout**
- **Realistic, affordable price**

## **10-Channel**

UHF Frequency Agility

*EV's N/DYM® Series UHF Wireless' ability to transmit and receive on one of ten selectable channels—combined with EV's unique ClearScan™ technology—make it the most preeminent wireless series available. As wireless technology and digital TV becomes more pervasive, so do the demands for the limited amount of space on the frequency spectrum. However, EV's built-in frequency agility gives the EV N/DYM Series UHF Wireless the capability to adapt to any wireless environment. In response to interference from other wireless mics or transmissions, the user can simply change channels with the help of EV's unique, one-of-a-kind ClearScan™ technology.*

## ***Transmitters***

*N/DYM wireless transmitters feature adjustable audio gain control, on/off and mute switches, up to ten hours of battery life on a single 9-volt battery, rotary channel-select switch and low-battery indicator. Bodypack transmitters feature a flexible 1/4-wave whip antenna, while the handheld transmitters contain an internal high-efficiency antenna.*

## ***Receiver***

*The N/DYM wireless receiver is housed in a half-rack-wide metal housing and features Secure-Phase™ diversity for clear, drop-out-free audio. Fixed, front-mount antennas for quick system setup; balanced, mic-level XLR output; level adjustable, unbalanced, 1/4" output; a seven-segment, LED channel display; adjustable squelch control; Transmit and Diversity LED indicators and channel-change lockout. Single or double rack-mount kits are also available (RM-S and RM-D).*

## ***Handheld Systems***

*With N/DYM® microphone elements, all models feature unparalleled, cutting-edge, wireless vocal technology, including an internal, high-efficiency antenna. Rugged, comfortable, and sleek, N/DYM Series handheld wireless systems combine aesthetic sophistication with ergonomic logic.*

- **VOB™ technology** provides tailored bass response for controlled "proximity effect" and exceptional vocal clarity
- **Neodymium-based magnet** structure provides greater sensitivity and signal-to-noise ratio
- **Match sounds** with N/DYM wired microphones on stage

## NRU-N7

*Features the N/D767a element and all the makings of a premium, wireless lead-vocal microphone.*

- **Supercardioid** pattern for superior feedback rejection and acoustic isolation
- **Multistage shock mount** for unmatched, low-handling noise
- **EV's unique VOB™ technology** provides tailored bass response for controlled "proximity effect" and exceptional vocal clarity

## NRU-N2

*Features the N/D267a element for high-quality lead and background vocals in today's live sound applications*

- **Cardioid pattern** for excellent feedback rejection and acoustic isolation
- **EV's unique VOB™ technology** provides tailored bass response for controlled "proximity effect" and exceptional vocal clarity

## NRU-N1

*Features the N/D167 element making it the most affordable high-quality wireless vocal microphone available.*

- **Cardioid pattern** for excellent feedback rejection and acoustic isolation
- **EV's unique VOB™ technology** provides tailored bass response for controlled "proximity effect" and exceptional vocal clarity

## ***Bodypack Systems***

*All models feature ultra-compact, ergonomically designed style and function*

- **Flexible** 1/4 wave-whip antenna
- **Virtual invisibility** in most performance situations

### **NRU-L10**

*NRU-L10 features the OLM-10 omnidirectional lavalier microphone*

### **NRU-L20**

*NRU-L20 features the ULM-20 cardioid lavalier microphone*

### **NRU-H1**

*NRU-H1 features the HM-2 headworn microphone*

## Guitar Systems

NGU

*The NGU Guitar System features circuitry specifically designed to handle a guitar signal*

- **Reliable 8-10** performance hours of 9-volt battery life
- **Unique design** preserves natural guitar and amp tone
- **User-friendly** design ensures virtually 100% error-free operation
- **Includes cable** with standard 1/4" guitar plug-in
