

DESCRIPTION AND APPLICATIONS

The Electro-Voice Model 300 detachable microphone clamp was designed for mounting any cylindrical microphone with a one-inch case diameter onto a microphone stand with standard 5/8"-27 threads. It may be used with Electro-Voice microphone Models 654A, 655C, 676, RE50, 670, or 670V.

The Model 300 is constructed of durable Lexan to provide a positive non-slip grip on the microphone. Use of this non-metallic material prevents marring or scratching of the microphone case. No tools are required to mount the microphone in the clamp, permitting quick change from hand-held to stand use.

The clamp may be rotated approximately 180° for easy orientation of the microphone to any angle.

SPECIFICATIONS

Material:	Lexan
Finish:	Black
Weight:	2 ounces
Dimensions:	3-3/16" h, 1 1/2" outside diameter, 1" inside diameter
Stand Thread:	5/8"-27 thread
Available Accessories:	Model 305 (5/8"-27 to 1/2" pipe thread adaptor)
